Last Voyage of Texan To Coast With Hawaiian Raw Adds \$70,000 To Value

GREATER USE OF SUGAR IN EUROPE EXPLAINED

Product Essential To War-Time Living In Britain and Grows Scarce In Germany

"When my ship comes in" again is clothed in its golden habiliments as a form of expression among men who deal in cargoes of sugar.

With raw augar in transit from the Hawaiian Islands to the Coast gaining in value by leaps and bounds, as it has the last few months, reaching a elimax on April 25 of six dollars and thirty-nine cents a hundred, a single rise of twenty-four cents a hundred over the previous day, mainland owners of expectant cargoes have taken to estimating the daily increase of their wealth by the thousands of dollars for each day their ships are over-

Seventy thousand dollars represented the increase of a day in the value of the 14,000 ton cargo which recently arrived at San Francisco in the steam er Texas of the American-Hawaiian line, this increase being due to advance of twenty-four cents a hundred for raw sugar.

Late Delivery Saves Less Sugar men pointed out that if the quotation instead of current, that figto the shippers as a result of reaching the market a day too early.

"pace" at which the country is living and working, says a medical exing and working, says a medical ex-pert of London. He explains:

reports issued recently was that dealing with sugar consumption during the first year of the war.

significance of the figures apoke in a pained way about a lack of national conscience and efforts were made to preach economy. Nobody pointed out that the high consumption of su gar was due directly to the fact that war had whipped up the activities of every man, woman and child in the higher price sugar was worth the

Sugar Fuel of Activity

The simple truth that one may in in the region of Aleppo." fer from the demand for sugar is that the whole rate of life has been quick ened in this country. Sugar is the fuel of activity and in activity more and more sugar is burned. In England, and indeed all over Europe, mer are now living at a greater rate that in times of peace. Civilization, if you will, is going the pace, and for the pace sugar is essential no matter what the price may be.

From all parts of Germany are com ing reports of the searcity of sugar The war has shown how indispensable n foodstuff sugar is; two grammes are said by chemists to be equal in nour ishment to one gramme of butter. And since butter and margarine and lard and all kinds of fats are now only procurable in very small quantities at very high prices, the importance of sugar has become much greater than ever before.

When the war broke out the Geman sugar interests feared they would be swamped with their stocks and implored the government to permit them to continue to export it as before, as serting that the next harvest, added to the stocks on hand, would suffice for all human needs for two years. The government consented, and the consequence was that immense quantities of sugar were sent through Holland and reached the English market. This permission to export was soon withdrawn but it proved how the government had underestimated the length of the war Substitute For Butter and Fats

At first augar prices rose scarcely at all, it was only when butter and fats began to grow scarce that German housewives were urged to substitute

sugar for them in the form of jams Then came the idea to use sugar for fodder purposes, and nearly a million tons were consumed in this way last year. Large quantities also were taken for making a compressed yeast for the bakeries and in the manufacture of suirits instead of the usual grain and

potatoes. The area of sugar beet cultivation decreased also owing to the higher rents demanded for land and the production has decreased because of the scarcity of labor and of artificial ma-Taken at the best, the beet crop of 1915 brought only some 3,000, 500 tons, against 5,500,000 tons in nor The government has now forbidden the use of sugar for cattle feeding, and also in breweries, and colote and candy manufactures by onehalf. But still in March, before the

There is little doubt that large quan for higher prices, despite all the threats of the authorities against per sons acting in this manner.

# HARBOR IMPROVEMENT BALANCE MAY LAPSE

Chamber of Commerce Wants Fund Spent In Islands

The Kahului west breakwater is at present before the senate committee of congress and the rivers and harbors bill carried an appropriation of \$250,000. This will be enough for the completion of the work on this section of the Kahului harbor improvement.

The Honolulu harbor improvement, which originally carried an appropriation for \$80,000 and which was increased to \$186,000, has been bid on and the lowest bidder was a Const firm, which bid the original appropria-This leaves \$106,000 for the work, which will not be needed to carry out the specifications for the present contract and there is a possibility that the appropriation balance may lapse.

This being the case it has been determined by the Belegate to Congress and the chamber of commerce to use every endeavor to have this money expended in the Territory. If it may not be used for Honolulu harbor improvement then an attempt will be made to have it diverted to some other purpose. Secretary McCleffan has been cabled o to use his best endeavor to have the balance of the appropriation put to use instead of lapsing.

## TERRITORY MAY ESTABLISH FOREST RESERVES FOR ROAD

The territorial forester has announced his intention of turning portions of the land lying on each side of the volcano road into forest reserves, in accordance with a plan of the forestry commission to conserve bits of Hawsiiun forests and woodland as tourist attractions. An engineer from the territorial surveyor's office is now engaged in running the lines and securing data for the ferester. The portion proposed lies on the old lava flows, says Mr. Judd, and is covered with ohin, tree ferns and lele vines. The portion besade on the trial of the case of the gins on the Hilo end of the road, four 130NDON, May 9.
